WORK EXPERIENCE

Leading Business Analyst, Committee of Finance of Saint Petersburg

Feb 2022 – Mar 2023

A government structure that manages financial resources, budgeting, and ensuring financial stability in the city and collaborates with various public and private sector entities to drive economic growth, foster financial transparency, and maintain regulatory compliance.

- Developed comprehensive user documentation that over 5000+ users utilised, maintained API documentation for the development teams, and drafted information exchange agreements.
- Created a risk assessment, compliance, and business intelligence system from scratch, integrating 70 data sources, implementing seven new services, and reducing data access times from day to hour for 5000+ users.
- Ensured compliance with anti-money laundering (AML) regulations through detailed financial process assessments.
- Identified cost-saving opportunities, reducing operational expenses by 10% without compromising service quality.
- Presented complex financial matters to high-level government officials, facilitating informed decision-making.
- Prevented reputational damage and penalties by resolving critical financial reporting discrepancies through data analysis.
- Collaborated with professionals from different fields, such as decision-makers, designers, and developers, to create a robust financial planning framework, improving the city's annual budget forecast accuracy by 5%. This enhancement increased profitability by 14% year-on-year.

Leading Site Reliability Engineer, Department of the Federal Treasury

Jun 2012 – Jan 2022

A governmental structure manages federal budget funds and implements national financial and budgetary policies within the Saint Petersburg region.

- Conducted software system failure analysis, developing a mitigation framework that resolved over 300+ significant cases obstructing over 50% of the system's functionality.
- Handled client requests for new features, including information gathering, prioritisation, and implementation.
- Boosted product user satisfaction to 92%, as per the results of an annual survey.
