## Summary

Adaptable Business Analyst with extensive experience in the financial sector, particularly within government agencies. Skilled in data consolidation and analysis, risk assessment, compliance, and business intelligence systems. Proficient in technical writing, software failure analysis, and problem-solving, with a customer-centric approach and excellent communication skills.

Tools and Technologies: SQL, Miro, Microsoft Excel.

## Experience

### Leading Business Analyst

Committee of Finance of Saint Petersburg

Feb 2022 - Mar 2023 (1 year 2 months)

The Committee of Finance is a government agency responsible for managing financial resources, budgeting, and ensuring financial stability in the city. The organisation collaborates with various public and private sector entities to drive economic growth, foster financial transparency, and maintain regulatory compliance.

- Developed comprehensive user documentation, maintained API documentation, and drafted information exchange agreements.
- I created a risk assessment, compliance, and business intelligence system, integrating 70 data sources, implementing seven new services, and reducing waiting times for 5,000+ users.
- Through thorough financial process assessments, it ensured compliance with anti-money laundering (AML) regulations.
- I identified cost-saving opportunities, reducing operational expenses by 10% without compromising service quality.
- I presented complex financial matters to high-level government officials, facilitating informed decision-making.
- It resolved crucial financial reporting discrepancies through comprehensive data analysis, preventing reputational damage and penalties.
- I collaborated with interdisciplinary teams to develop a robust financial planning framework, improving economic forecast accuracy.
- I stayed current with best practices in public sector finance through industry conferences and certifications.

### Leading Site Reliability Engineer

Department of the Federal Treasury for Saint Petersburg

Jul 2012 - Feb 2022 (9 years 8 months)

- Managed and supported the operation of software applications for internal and external clients;

- Analyzed failures and violations in software systems, developed proposals for their elimination and prevention.
